Friday 8:30 am – noon

We can usually schedule an appointment the same or next day if you are ill, otherwise we can arrange appointments for non-urgent visits usually within a week. If you become sick after regular office hours you may need to go to the nearest Urgent Care facility or hospital Emergency Room for evaluation.

MEDICAL SERVICES:

EKGs; joint and other orthopedic injections; school, sports and work physicals; management of diabetes, cholesterol and high blood pressure; Holter monitoring; spirometry; dermatological services such as removal or treatment of skin cancers, warts and other lesions.

PRESCRIPTION MEDICATION REFILLS:

Please allow 48 hours for prescription refills. Call the office with your request during regular office hours, as we cannot refill prescriptions after hours or on weekends.

MAXIMIZING YOUR OFFICE VISIT:

Here are some helpful hints to getting the most from your office visit:

1. Bring in your medicine bottles or a current list of your medications with the doses each visit. If you are diabetic or have high blood pressure, be sure to bring your logs or current readings with you.
2. Please understand that your doctor may not be able to address all of your medical problems in one visit. Choose one or two of your primary concerns that you wish to discuss in detail during that day's visit. Other concerns may be discussed in detail during a follow-up visit. This allows your doctor time to thoroughly evaluate your condition and fully explain your treatment options.
